Summary

Highly motivated Computer Science and Wireless Networking graduate with practical experience in SQL Server, cloud infrastructure, and business application administration. Proficient in a variety of technologies, including programming (C, C++, C#, Java, Python), databases (MySQL, MongoDB), cloud services (AWS, Azure), and automation tools. Experienced with ETL pipelines, REST APIs, monitoring tools (Datadog, Dynatrace), and SaaS platforms, including Microsoft Teams and Jira. Provides extensive knowledge of networking, cybersecurity concepts, and SDLC (Agile/Waterfall). Recognised for analytical problem-solving, critical thinking, and collaborative cooperation. Capable of learning rapidly, communicating well, and contributing to high-impact IT initiatives.

Technical Skill

Web Development: HTML | CSS | React.js | Databases: SQL Server | MySQL | MongoDB | Scripting: PowerShell | Python scripting | Cloud Platforms: AWS | Azure Fundamentals | Automation & Testing: Selenium | Cucumber | TestNG | JMeter | REST APIs | DevOps & Infrastructure: Kubernetes | Docker | Ansible | Terraform | Jenkins (ETL Pipelines) | Git | GitHub | Monitoring: Datadog | Dynatrace | Prometheus | Logging: ELK Stack | Networking and security: TCP/IP | VPNs | DNS | Firewalls | SaaS & Tools: Microsoft Teams | Jira | Identity & Access Management (IAM) | Methodologies: Agile | Waterfall | Soft skills: problem-solving, analytical thinking, critical thinking, collaboration, clear communication, reliability, and adaptability.

Work History

Amazon, India ***Sep 2020-Nov 2021***

Cloud Engineer

- Created automation scripts to streamline repetitive processes, resulting in a 25% reduction in manual workload.
- Worked with cross-functional teams to increase system robustness and resilience in hybrid cloud environments.
- Integrated cloud infrastructure deployment with Terraform and Ansible to ensure reliable and effective resource provisioning.
- Designed and implemented containerized applications with Docker and Kubernetes, allowing for scalability, high availability, and flawless workload management.
- Administered and optimized Linux-based systems, adopting resource utilization strategies to improve system performance and dependability.
- Actively contributed to creating internal knowledge base articles, sharing insights and best practices with the broader support team.

Amazon, India ***Aug 2019-sep 2020***

ML Data associate

- Conducted in-depth analysis of the Goal Success rate for the device, utilizing statistical methods and data visualization tools, including Excel, to assess data capture quality.
- Implemented supervised machine learning algorithms to categorize extensive datasets, achieving a precision rate of 95% in data labeling.
- Conducted rigorous data quality analysis, employing Python scripts, SQL queries, and Excel, to identify and eliminate outliers, thereby enhancing model robustness.
- Spearheaded a manual annotation initiative, contributing to a 15% improvement in device accuracy, and processed over 10,000 data points.
- Introduced and implemented a data validation framework, reducing errors by 20% and ensuring the integrity of labeled training datasets.

Education

- ***Post-graduation in Wireless networking*** ***CGPA: 3.5/4***
  Lambton College, Canada ***Jan 2022- Aug 2023***

- ***Bachelor of Engineering in Computer Science Engineering*** ***CGPA: 7.9/10***
  Anna University, India ***Aug 2015- May 2019***

Certifications

- Certified in IoT (Internet of Things), PHP, and JAVA.
- Introduction to cybersecurity.
- CompTIA+ Security.
- Introduction to DevOps.
